## **INTRODUCTION**

The Portuguese Society of Authors (SPA) is a limited liability cooperative, established in 1925 with the purpose of defending the rights and interests of the authors it represents through collective management. At the present time, the Portuguese Society of Authors is the representative in Portugal of rights' holders from all over the world since, in addition to the works it manages directly, it has reciprocity agreements with sister societies, empowering it to safeguard the rights of foreign authors. Therefore, by granting licences for the public performance of musical works, SPA is authorizing the use of works both from Portuguese and foreign authors.

One of SPA's key roles is to grant licences for different types of use of musical works and to collect a compensation fee in return. In fact that compensation fee represents the remuneration that an author is entitled to for any use of his/her works.

Whenever an author creates a musical work, he/she is automatically entitled to use or authorize the use of his/her work by third parties. The authorization that may be granted by the author may or may not imply (depending on the author's wishes) the payment of an amount considered appropriate by the author. The amount established by the author therefore represents the payment to which he is entitled for the use that will be made of his works.

By acting on behalf of the authors, this right to authorize the use of the works will be exercised by SPA, as well as to establish the amount to be paid as compensation for the use.

The present tariffs were elaborated taking into the consideration the above mentioned principles, in order to strike a balance between SPA's fundamental activity, to protect the interests of authors, on one hand, and because of the multiple circumstances and uses of a creative work, to organize the types of users and fees, through objective differentiation, thus ensuring greater consistency.

Public performance includes all sounds and performances rendered audible to the public in any place, by any means and in anyway whatsoever, whether the said means are already known and in use, whether hereafter discovered and put to use. This includes therefore all auditions and performances provided by live means, instrumental or vocal, by mechanical means, such as phonographic records, microphones and sound tracks (magnetic or otherwise).
